Company Corporate Expense & Travel Policy

1. Overview of Corporate Expense Reimbursement

CORE Technologies is committed to reimbursing employees for necessary and reasonable business expenses incurred during the performance of their official duties. All expenditures must align with company budgets, support business goals, and be documented accurately.

2. Travel and Lodging Policies

When traveling for corporate events or client meetings, employees must adhere to the following limits:

- **Airfare**: All flights must be booked in economy class. Business-class travel is only permitted for continuous intercontinental flights exceeding eight hours in duration, and requires prior written approval from the Department VP.

- **Daily Meal Allowance (Per Diem)**: The maximum reimbursement for meals is capped at $75 per day within North America, and $90 per day for international destinations. Alcohol is not reimbursable under the standard meal policy.

- **Lodging**: Hotel accommodations must not exceed $250 per night in major metropolitan areas, or $180 per night in other locations.

3. Expense Submission and Approval Workflow

To receive reimbursement, employees must compile all receipts and submit an expense report via the internal finance portal within 30 days of incurring the expense. Receipt submissions are mandatory for any individual transaction exceeding $25. Reports are automatically routed to the direct manager for approval, and payments are processed via direct deposit within 10 business days.
